Subject: AS/SVE Treatability Study and EPA Responses

Joe

Please find attached the AS/SVE Treability Study that was submitted to the EPA in May 1999. Representatives from the EPA reviewed the study and agreed in the September 1999 response letter (page 3) that the design and installation of a full scale AS/SVE system was not appropriate. The EPA also noted that Franklin Power Products has in essence, fulfilled the requirements of Section VIII.F of the Consent Order and is released from the requirements of Sections VIII.G and H of the Consent Order. I have also attached a copy of the 1998 Consent Order for your quick reference.

The February 2000 EPA letter is a follow up to the additional comments/request for information in the Sept 1999 letter and indicates that the EPA is satisfied with the upgraded groundwater recovery system and lays out the recommended groundwater monitoring and sampling protocols moving forward.

Please let me know if you need anything else.

Sincerely,

Bradley E. Gentry, LPG
